Oleg Mishunin

E-mail: rjawiygvozd@gmail.com

Skills

C#, ASP.NET Core/ASP.NET, SignalR, MS SQL, Dapper

JavaScript (ES6), HTML, CSS, JQuery, Bootstrap, Handlebars templates

Other: Linux administration, Sphinx/Manticore search engine, gulp, Python (also numpy, scipy, PyQt), Bash, Powershell

Languages: fluent english, native russian

Technologies I have basic or superficial knowledge of but interested in learning deeper and using in real projects: Golang, Elixir, Rust, React, MongoDB, PostgreSQL

Experience

2018-2022

Work on a series of projects as a full stack web developer through a contract with *web-automation.ru*, a company that has connections with multiple clients and a team of developers I could work with primarily on a project called TuMarket (as lead developer since 2020), a marketplace operating in russian far east.

Technology stack we used is ASP.NET (moved to ASP.NET core later), MS SQL Server, Dapper, JQuery and Bootstrap. I've been involved in tasks including both frontend and backend development, database administration and optimization, server administration, SEO (incl. schema.org and opengraph), integration of payment services and other APIs, image processing, code reviews, code refactoring and others.

Some of the functionality implemented:
- Orders
- Payments
- User geo location. Picking or detecting a city, suggesting merchandise based on proximity, map integration.
- Instant search suggestions
- Websocket based chats
- Data import API accepting JSON, XML, XLSX/XLS
- General website layout rework

Education

Tomsk Polytechnic University, Master of Computer Science, 2008-2014

Postgraduate work on the topic of computational lingustics/semantic analysis, 2014-2018
